TMDLs

Staff from both ports have been working with EPA and LA-RWQCB staff on development of the Harbor Toxics TMDLs. Draft TMDL addressing pollutants expected in late 2010 for public review and comment.

NPDES Permits

New permits for Los Angeles County (including City/Port of Los Angeles), City of Long Beach and Port of Long Beach are pending. Both ports have had individual discussions with agency staff on the preferred framework for compliance with current and future NPDES permits.
**LU-1** – Housekeeping BMPs

**POLB** – First set of new measures identified and implemented. Program ongoing.

**POLA** – Tenant Outreach Program developed and implemented; implementation underway. First set of measures recommended. Program ongoing.

**LU-2** – Design Guidance Manual (SUSMP)

**POLB and POLA**: Draft manuals complete. To be finalized in 2011.
**LU-3** – Structural BMPs

**POLB** – First set of new BMPs identified and implemented. Program ongoing.

**POLA** – Tenant Outreach Program developed. First set of BMPs identified and recommended. Program ongoing.

**LU-4** – Stormwater/Dust Control for Orphan Sites

**POLB**: High priority sites addressed. Program ongoing.

**POLA**: Identified and prioritized sites. New program to begin implementation by end of 2010.
LU-5 – Litter Control Program

POLB – Program developed and being implemented.

POLA – Program under development; to begin implementation by end of 2010.

LU-6 – Public Area Sweeping Program

POLB and POLA: Studies complete and recommendations under consideration.
LU-7 – Port-wide Stormwater Construction Permits

**POLB** and **POLA** – Evaluations of new general construction permit requirements completed and enhancements in place as part of ongoing port compliance programs modified accordingly.

LU-8 – Remote Sites Stormwater Compliance

**POLB** and **POLA**: Sites have been inventoried and evaluated.
Control Measures
Updates and Milestones

OW-1 – Vessel Guidance Manual

**POLB** and **POLA** – Guidance manual completed and distributed to stakeholders.

An update of the Clean Marina Guidebook was completed and distributed to all port marinas.

OW-2 – Piling Replacement Policy and Standards

**POLB**: BMPs developed and pilot project underway.

**POLA**: BMPs developed and evaluation program underway.
**Control Measures Updates and Milestones**

**OW-3** – BMPs and Standards for Cathodic Protection

**POLB** and **POLA** – BMPs and port standards in review. To be completed by the end of 2010.

**S-1** – Operations Sediment Management Plans

**POLB** and **POLA**: Internal drafts complete. Final plans anticipated by the end of 2010.
S-2 – Legacy/Hotspot Management Plan

POLB and POLA – Draft implementation plan developed; will be finalized through the TMDL process. Dredging at IR Site 7 (POLB) began in the summer of 2010.

WS-1 – Support Pollutant Loading Reduction Efforts

POLB and POLA: Participation in watershed activities is ongoing, including TMDL development, attendance at DWAC meetings, and POLA coordination with City of LA regarding City-wide source reduction efforts.
POLB

ARS Catch Basin Inserts
Trucker Trash Cans
Plastic Piles

POLA

Catch Basin Inserts
Trucker Trash Cans
Pile Wrap Systems
Next Steps

• The ports will continue to move forward with development and implementation of the various control measure programs.

• Additional milestones, and future updates to the WRAP document when warranted, will be documented in subsequent annual progress reports.

• Questions/comments?
